WORK EXPERIENCES

Software Development Associate | Part-time

May 2025 - Jan 2026

ITSA – (Information Technology Students Council)

On-site • PCCOE

- **Engineered** an event management platform that onboarded **3,500+ students** across hackathons, workshops, and technical initiatives.
- Implemented a Unique **Student ID-based registration** and attendance system, automating participant verification and tracking.
- **Developed** responsive full-stack web applications, streamlining event discovery, registration, and engagement for the student community.

Technologies / Skills Used : HTML5, CSS3, React.js, Node.js

AI/ML Intern | Internship

Mar 2025 - May 2025

Personify

Hybrid • Bengaluru/Karnataka

Engineered TensorFlow-based computer vision models for **image classification** and **object detection**, achieving over **94% accuracy** across multiple datasets.

- Optimized **CNN architectures** using transfer learning, data augmentation, and hyperparameter tuning, resulting in a **15% improvement in F1-Score** and enhanced model generalization.
- Designed automated preprocessing and training pipelines, **reducing data preparation time by 40%**.
- **Evaluated** model performance through Precision metrics, **reducing false detections by 25%** and improving prediction reliability.
- Enhanced inference efficiency through feature extraction and model optimization techniques, **decreasing prediction latency by 30%** while maintaining high accuracy.

Technologies / Skills Used : Python, TensorFlow, Machine Learning, NumPy, Pandas

PROJECTS

Code Campus — Proctored Coding & Learning Platform | 🌐 Codecampus

Sep 2025 - Present

- Developed a VS Code-style IDE with **integrated real-time code execution**.
- **Enhanced** assessment integrity for **90+** students through secure automated proctoring.
- Built a **context-aware AI** assistant providing **adaptive hints** and **debugging guidance**.

Technologies / Tools Used : React.js, Vite, JavaScript, Express.js, MongoDB

Brain Tumor Detection — MRI Classification using Machine Learning | 🌐 TumorAI

Aug 2025 - Nov 2025

- **Delivered 96.3% classification accuracy** on unseen MRI scans using an optimized **SVM-based diagnostic pipeline**.
- Improved model reliability with only **9 misclassifications**, leveraging image preprocessing.
- Benchmarked multiple **ML classifiers**, achieving superior detection performance and generalization with **SVM**.

Technologies / Tools Used : Python, Scikit-learn, OpenCV, NumPy, Matplotlib, SVM, Logistic Regression, Computer Vision

Clarity — AI Mental Health Companion | 🌐 Clarity

Jan 2025 - Apr 2025

- Built an **AI wellness platform** with conversational support and mood tracking.
- Enabled **real-time peer interaction** using WebSockets.
- Built scalable backend services supporting **real-time user interactions**.

Technologies / Tools Used : React, TypeScript, PostgreSQL, TensorFlow

SKILLS

Programming Languages :	Python, C++, JavaScript, TypeScript, SQL
Frameworks & Libraries :	React, Node.js, TensorFlow, Scikit-learn, Pandas, NumPy
Databases :	MongoDB, PostgreSQL, MySQL
Tools & Platforms :	Git, GitHub, Linux, Docker, CI/CD
Soft Skills :	Problem Solving, Teamwork, Decision Making, Critical Thinking, Adaptability

EDUCATIONS

Pimpri Chinchwad College of Engineering (PCCOE) | Pune

2024 - 2028

Bachelor of Technology in Information Technology

CGPA : 8.3

- **Relevant Coursework:** Machine Learning, Data Science, Cloud Computing, Generative AI.

CERTIFICATIONS

IBM Data Analyst Professional Certificate

2025
